

CARO-LINE

The Caro-line collection has been created around geometric drawings : squares (in French: carreaux, pronounced "CARO"), lines (LINE), circles, diamonds ... which are presented in their pure form, or combined : lines are making squares, squares are lined up, lines are intersecting rectangles ...

The palette of colours varies from metallic and shiny colours to very soft shades (pastel yellow and ochre, caramel, aubergine, ...)

The non woven textile wallcovering, 1m wide is tear- and abrasion resistant, has a fire hazard classification (UK and US standard), is treated to resist stains and soil, is resistant to impacts and scratches, ecological and peelable. Moreover, it is stable and easy to hang: ready-made PVA or EVA glue, to be applied to the wall, no need to humidify the back of the wallcovering.

The matching fabrics are double voiles (width 1.40m), in which transparent geometric designs are woven: fabrics turn out to be windows ...

Wallcoverings and fabrics are sold cut-length.
