

# MILANO

Milan... sumptuous city of Italian design, of fashion, city of the future, but also city of glorious relics from a rich and opulent past.

The new collection of Omexco combines a traditional weaving technique, the jacquard weave, with a modern backing: a non-woven backing, which makes installation easy (glue on the wall - unnecessary to humidify the backing).

"Milano" is the elegance of baroque and classic designs in a contemporary interpretation - a subtle and delicate texture and exquisite and rich colours. Damasks, medaillons, all-overs in deep red, royal blue, pearly grey, champagne, gold...

The wallcovering is sold cut length (width 140 cm), has a stain repellent treatment, a good light resistance, and it meets the European fire standard class B S1 D0.
