

SHADOW & LIGHT

The small geometric patterns are created by means of a special embossing technique, which confers the wallcovering a special "shadow/light" effect.

The colour range comprises all favourites of people who value a sober and contemporary decoration : cool grey and white, restful green, steel blue, soft beige and brown, warm wine colour...

The wallcovering is 1 m wide, tear- and abrasion resistant, has a fire hazard classification (UK and US standards), complies with the Council Directive 96/98/EC on marine equipment, is treated to resist stains and soil, is ecological and peelable. Moreover, it is stable and easy to hang.
