

SILVER & GOLD

The new wallcovering collection of Omexco - Silver and Gold - is as precious as its name implies. The lustre of metals - gold, silver, bronze - is present on most non-woven wallcoverings, sometimes as a light dust for the plains or the small all-over designs, sometimes as a thicker layer, in combination with matt and/or contrasted colours. The designs are timeless, even if some of them are winking at the sixties/seventies (large leaf designs, multi-coloured geometrical patterns...).

The wallcoverings are non-woven (easy to install: glue on the wall), 1 m wide, washable, ecological, fire rated, light resistant and sold by cut length (no minimum order required).

The collection also comprises 6 monocoloured fabrics with a crush finishing, matching the wallcovering, in Trevira CS quality. Width +/- 130 cm, sold by cut length.
