

VIA DELLA SETA

“Via della Seta” means “Silk Road” and refers to the road that European explorers and trades men used to follow on their way to Asia in medieval times. From Asia they imported spices and silk.

For the wallcovering of “Via Della Seta” we have used traditional warps on non woven backing, but printed with a very new and special technique in order to obtain a perfect “silk look”.

The matching fabrics are 100 % silk.

Wallcovering and fabric reflect the light in different shades. Colours vary from very soft pastels to bright and strong colours.
