

VILLA ERBA

The design of this collection recalls the atmosphere of luxurious houses of the Italian 18th Century.

New and unexpected colours however, give a different dimension to the collection and make it very trendy.

Traditional warps are used on a non-woven backing.

The wallcovering is 90 cm wide, stain repellent and fire resistant.

The backing is non-woven, which makes the installation of the product easy (glue on the wall - no need to humidify the back of the wallcovering).
